Implementation Engineer: Data Migration and Customer Onboarding

Trainer turned implementation engineer, with twenty years onboarding clients and guiding them step by step from messy starting points to their goals. I built Cutover to move messy data into new systems, flagging every problem so nothing gets missed.

Technical projects

Cutover: fail-closed data migration toolkit · Python, YAML, SHA-256, S3 · code and demos — 2026

- Built: a five-stage pipeline (validate, map, reconcile, verified S3 upload, runbook) driven by reviewed YAML rules; every stage refuses to overwrite, repairs nothing, and blocks the handoff on any failure.
- Proof: 34 tests, CI green; worked examples move a 200-row property-management tenant export and a 150-row legacy parts list into a cloud table with byte-for-byte comparison and checksum verification.

Ames Home-Price Lab: ML service, end to end · scikit-learn, MLflow, DVC, Streamlit, Docker, GitHub Actions · live demo · code — 2026

- Built: tracked experiments, an exported pipeline with a checksum manifest, a reviewable input form, Docker, and CI that runs tests, training, and a container check.
- Proof: MAE $17,765 on 586 held-out homes, 72% below baseline; 83 tests; capstone graded 91/100.

Gym Swap: rules-driven exercise substitution app · JavaScript, esbuild · gymswap.seeform.ai — 2026

- Built: a deterministic rules engine over 133 exercises and 270 reviewed comparisons; an optional explanation layer cites only reviewed coaching notes.
- Proof: 357 tests; versioned public releases (2.8.1), each tested on real phones before publishing.

Experience

Owner / Head Coach · Chi-Town Performance Lab (formerly Elite Fitness), Chicago — 2014 – Present

- Sole owner of a personal-training business: onboard clients, deliver step-by-step programs, track progress, and keep clients on course and retained; roster has ranged from a handful to 50 active clients.
- Led the migration of client records, scheduling, and course content onto a new CRM, mobile app, and education platform; validated every batch before cutover so no client lost history.
- Integrated Zapier, Manychat, and ActiveCampaign into one workflow, saving 80+ hours a month and lifting client compliance 30%+.

Personal Trainer (contract) · ElevateOS, Chicago — 2024 – Present

IT Helpdesk Technician · Captain James A. Lovell Federal Health Care Center (VA), North Chicago · Held public trust and Secret clearance for VA work (2023) — Dec 2023 – Jun 2024

- Resolved an average of 80 tickets a week for clinical and administrative staff with 100% user satisfaction; two Bravo Zulu commendations.
- Provisioned and managed user assets in Active Directory and ServiceNow under federal change control; documented every fix so the next technician could repeat it.

IT Technical Manager & Sales Support Specialist · Private Lending Group, remote — 2021 – 2023

- Launched a text-based lead-qualification automation that saved the sales team 10+ hours a week; directed contractors on web and CRM work.

Fitness Manager · VASA Fitness — 2021

- Launched a new club's training operation: hired and trained the staff, onboarded 150 clients in the first three months, and led the team to a top-five ranking among 50+ clubs within four months.

Volunteer Strength & Conditioning Coach · Naval Station Great Lakes, IL — 2013 – 2016

Education

TripleTen · AI/ML engineering bootcamp, 2026 (capstone: Ames Home-Price Lab, 91/100) · Data Analyst program, 2023 · **Roosevelt University** · computer science and programming coursework

Skills

Python · SQL · Bash · YAML · APIs · AWS S3 · Linux
